

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

There has been a long way and trajectory in the CEIP Seis De Diciembre to provide New Technologies in our school.

Since more than ten years our pupils and teachers have enjoyed ICT.

The *first* “**Computer Class**” was installed at school thanks to a Telephone Company gift.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

Step by step, the school has improved the ICT tools and means:

- The Council of Education of Madrid provided a **second newer Computer Class** with 13 computers with two Operative Systems (Windows and Max Madrid).

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- After that, thanks to the most increasing interest of our teachers in the use of ICT, the school started a plan to buy **second-hand computers** in order to place **one in each class**. Each year many semi-new computers have been bought to provide the different cycles.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- Meanwhile, teachers in our school were participating in many **different training courses** about the learning of the use of computers.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- This fact was known by the Council and it decided to offer us a project with TABLETS PC. All the staff accepted and there was a great investment in our school with **14 tablets-PC with digital pens, a free WI-FI installation** and a compromise of a two years training course to acquire a knowledge of these new tools.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- So little by little, our school was gathering an increasing number of ICT means.

The next to arrive were the **PDI** tool (Interactive Digital Board) . We´ve only got six now, by the moment.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- The **Council** sent two PDI with two new computers and installed them free.
- The third one was won by our pupils at a **Mathematic contest** from the Council of Education.
- The other three have been provided by the **publishers** of the school books that are used by the children (now this action is not available for many different reasons).

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- As we said before, Teachers have been involved in a great variety of teachers **training courses at school.**

Each year we have participated in:

- PFC (Projects of Training teachers in Schools)
- Courses
- Seminars

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

In order to learn **contents** about:

- Office (Word, Powerpoint,...),
- Open Office (Impress, Writer,...),
- Audacity, Pinnacle, Gimp, Tux Paint,
- Free Operative Systems like MAXMadrid,
- specific programs for tablets PC and their Digital pens (Windows Journal), etc...

Audacity

EDUCAMADRID

Office

pinnacle.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- Through all these years we have elaborated **many different activities** for our children with programs like PHPWebquest o SMARTNotebook but always we have been thinking only in ICT from a **curricular point of view**, like an open window for knowledge.
- We haven't considered or reflexionated about **the use we DO** about these tools or **how our pupils should DO it**.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- We haven't been thinking about how to focus that our pupils could manage ICT in a MEANINGFUL, CREATIVE and SECURE use.
- These children will be future users of computers, mobile phones with wi-fi connectivity and the social networks.
- We have to educate them for a responsible use of ICT.
- In this task we should be involved as well as their parents.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL.

- This is the reason why **we are participating** in this Comenius Project (**MCS**).
- We would like to reach to right actions for our children with the collaboration of all the partners.
- We hope we´ll get it with the join of all our efforts and illusion.

CEIP SEIS DE DICIEMBRE

ICT IN OUR SCHOOL

Thank you.
