ROBOT SCHOOL

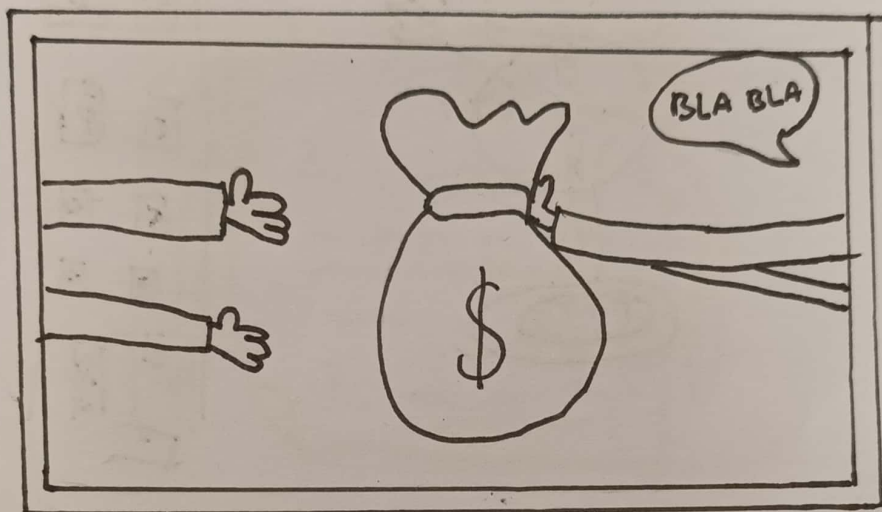

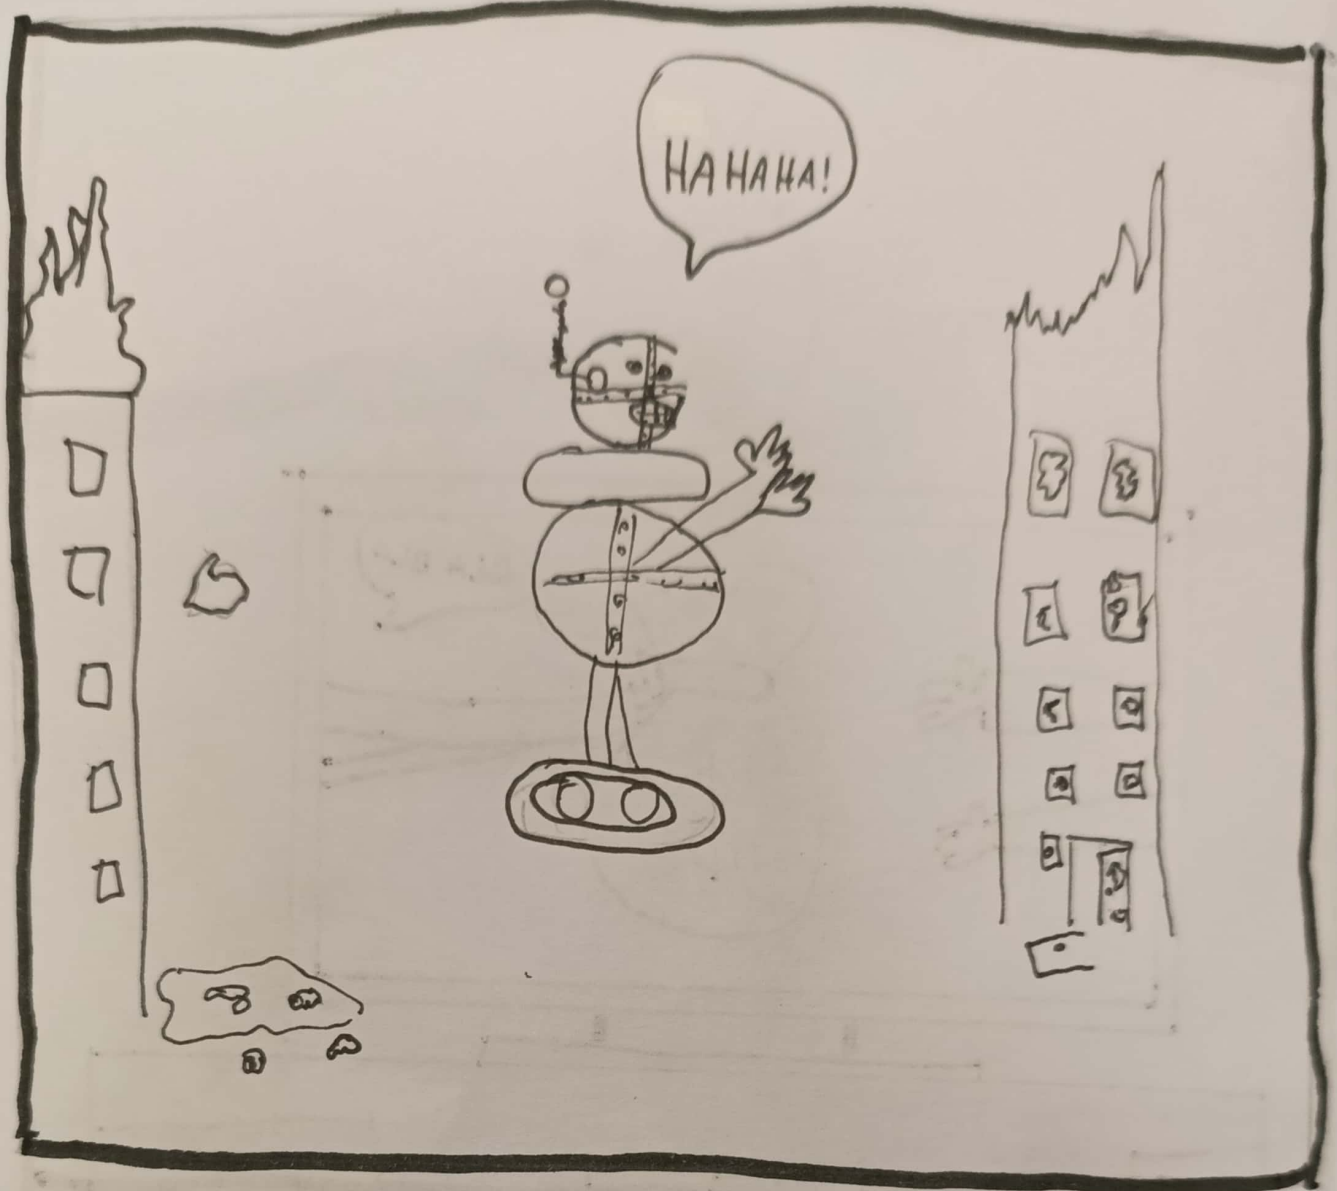

Sunday

The world we all have known has change in the last two years. Now a days there are robots in every where. They do almost all the work such as cleaning or building.

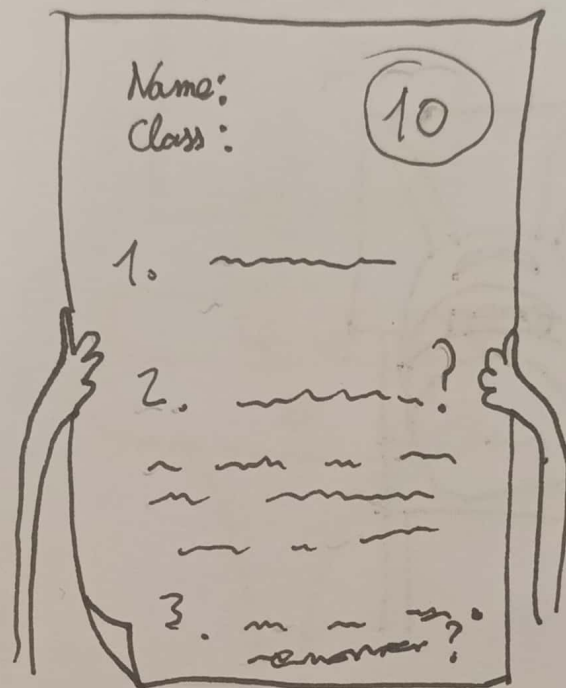

1.

These robots were invented by twenty people in somewhere of North America. They finished their job in three months. Right now, people that have helped to this, are very rich.

Mom doesn't like very much this idea. She thinks robots are going to take the planet, to destroy it and to make us their slaves. I don't think like her. We'll not let them to take the planet or to enslave us. We'll not give up. I HOPE so.

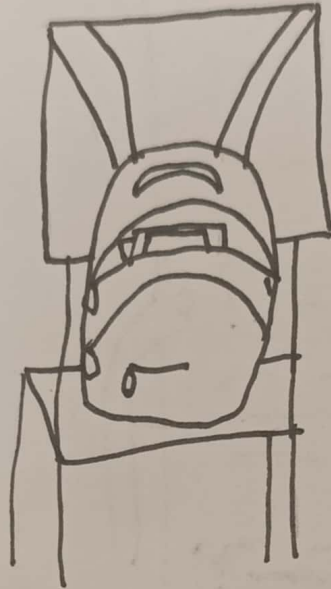

Monday

Do you believe, that also in schools, some teachers or classmates are robots? Really.

My biology teacher is a robot. It is strange to have class with him. Also, some of my classmates are robots. They are very clever.

They normally get tens on exams.

Once I sat on my chair, I started to pick my school material from inside my bag. The first class was of biology. It was a little bored. Then, we have physical education. The teacher told us to form pairs with the classmate sitting next to you. I have to be with E.4.

Guess what, I was with one of the robots. They aren't very good at P.E. So I went to the bathroom to wash my face. Then, I return to class. I had my hands wet yet. I touched E. 4 and it fell to the floor. I had broken it! All the class was looking at me.

6.

Someone called the teacher and he punished me. Then the teacher took £.4 to repair it. The principal of the school told my parents what I did. When I came home, my parents were very angry with me. Rodrick was laughing where mom and dad can't see him.

Tuesday

Robots were not enough happy with the punished they had given me. They started to chase me all school. I run and run faster I can and I get home safe.
